## on the packaging of FLOSLEK LABORATORIUM products

### LACTOSE-FREE

The product safe for allergy sufferers, does not contain lactose.

### GLUTEN-FREE

The product safe for allergy sufferers, does not contain gluten.

### GMO-FREE

The product safe for allergy sufferers, does not contain genetically modified ingredients.

### FRAGRANCE-FREE

The product safe for allergy sufferers, does not contain any fragrances and aromas.

### DYE-FREE

The product safe for allergy sufferers, does not contain any dyes.

### NATURAL-DYE

Natural dye color.

### CLEAN-BEAUTY

Transparent and minimalist recipes (formulas), based on safe and ethically sourced raw materials.

### WATER-FREE

The product does not contain water.

### EcoSun Pass®

A properly selected set of three UV filters (UVA and UVB) ensuring the criteria for evaluating products in terms of their impact on the environment and effectiveness of sun protection are met.

98% ingredients of natural origin

The percentage content of ingredients of natural origin.

A graphic symbol illustrating the shelf life of cosmetic after its first opening without the risk of endangering the user's health.

The products do not contain any ingredients of animal origin. The dermocosmetics are vegan-friendly.

A certificate of the international organization People for the Ethical Treatment of Animals - PETA, which fights for the rights of animals. Do not contain any ingredients of animal origin. The ingredients of the cosmetic and the final product have not been tested on animals does not contain ingredients of animal origin, and their launching to the market does not cause animal suffering.

Safe Microbiome® international certification based on in vitro and in vivo studies assessing the impact of products on the condition of the microbiome of the skin and mucous membranes.

Possibility of multiple use of the jar with the use of a refill. The outer pot can be used also for creams from other cosmetic lines FLOSLEK than the product originally purchased.

### 100% RECYCLABLE

The packaging is 100% recyclable.

### LDPE-4

The sign of the material from which the packaging is made, means low-density polyethylene.

Cardboard packages are FSC certified – awarded by organizations supporting forest management around the world.

The sign on the packaging means that the manufacturer has financially supported the packaging waste recovery and recycling system, created by ReKpol Organizacja Odzysku Opakowań S.A. in Poland.

### 50% TUBY TO RECYKLAT 50% OF TUBE IS RECYCLATE

50% of the tube material comes from recycle (re-processed material).

A sign reminding about responsible segregation waste. Sorting garbage allows processing and re-use of used packaging.

Scanning the QR code with a smartphone allows displaying the website [www.floslek.pl](http://www.floslek.pl), where there is more information about the offer.

*For 30 years we have been creating cosmetics, whose benefits you can feel and see on your skin!*

Flos means flower, and flowers are associated with nature, but also with women and beauty. They possess this extraordinary power and are good for our skin – for centuries they have given us their best, so that we could take care of our health and beauty. They have been inspiring us from the very first days of our company. They also gave rise to the name of the company - FLOSLEK.

Since 1994 FLOSLEK cosmetics and dermocosmetics have been taking care of you, nurturing and protecting your skin, bringing pleasure and relaxation, and pleasing the eye. Not only in Poland, but also in 50 countries around the world, from North America, through Europe and North Africa to Asia.

*Nature is at the heart of our formulations.  
It is also the source of inspiration  
for our laboratory!*

Everything we need to care for our bodies can be found in nature. That is why at FLOSLEK we focus on phytocosmetology.

During 30 years of operation we have used over 1500 different cosmetic ingredients, coming mainly from the world of plants, creating several hundred formulations with their use. That's how dozens of professional skin care lines were created for two brands: FLOSLEK Laboratorium and FLOSLEK Pharma.

We create innovative cosmetics, in line with the latest knowledge and European regulations. We are forever improving our formulas, always looking for ingredients with the potential to fulfil your needs even more effectively, for example those related to ageing processes, environmental pollution and increasingly common allergies. It's a never-ending process that pushes us to constantly follow trends, find and implement innovative solutions. In this process, we are supported by the extensive knowledge of our experts in the fields of botany and phytocosmetology and our own modern laboratories: research and development and quality control.

*We didn't wait for sustainability,  
environmental protection and  
naturalness to become a trend.*

From our first days, we have been making sure that our activities do not harm you, animals or the environment. Our first cosmetic - the famous eyebright under eye gel - was vegan. Today, around 95% of the formulations created in our laboratory are vegan cosmetics, based primarily on ingredients of natural origin (around 80% of our cosmetics have more than 90% ingredients of natural origin in its composition). We've also never tested our products on animals – as evidenced today by our 2019 PETA.

*The quality and safety of cosmetics  
are our priority!*

Back in 2002, we implemented a quality management system, confirmed by the ISO 9001:2015 certification. It was granted to us in the field of development of formulas for new cosmetic preparations and their production and sale.

In 2012, as one of the first cosmetic companies in Poland, we were granted a certificate confirming that during the production of our products we apply procedures based on the GMP system (Good Manufacturing Practice).

In 2023, we implemented and certified the ISO 13485:2016 standard for medical devices. These provide a full guarantee that our products are of the highest quality.

# For the sake of a better future!

**YES**

*to sustainable development strategy*

The mission of the cosmetic industry is to keep everyone looking good and beautiful. To fulfil it, the state of the environment in which we live and work is extremely important, as it has a huge impact on human health and, consequently, beauty. Therefore, we are always looking for solutions to minimise the environmental impact of our products.

We are therefore taking a number of measures to establish ourselves as an ethical, sustainable company. The key areas for us are those on which we have the greatest influence, i.e. issues relating to the protection and prevention of environmental degradation, social responsibility as well as corporate governance and management quality.

In 2022, we combined the previously implemented initiatives with new ventures and created a coherent ESG strategy – For the sake of a better future.

*We want to act in such a way as to combine our business goals with care for the planet on which we live. We want to be able to enjoy its plant life, our skin needs to stay healthy and beautiful – for years to come...*

**YES**

*to a clean environment!*

*It's our greatest challenge!*

To date, we have implemented a number of pro-environmental solutions we called **#floslekecosteps**. We can proudly declare that:

We were one of the first companies in Poland to offer you **creams in exchangeable refills, which are 100% recyclable**. Each refill means 80% less plastic and 60% less paper in our environment.

We have invested in **renewable energy sources** within our company. **The solar panels** installed in the first phase will meet 20% of our annual electricity needs.

For our cosmetics, we choose packaging that is **100% recyclable** (the exception being barrier tubes) and, in addition, made partly from recovered and recycled plastic - recycle. Currently, of all the tubes and bottles used to package our products, **85% are made with up to 50% PCR**. The proportion of glass packaging is steadily increasing among all the packaging we use.

From 2021 onwards, we only use **FSC®-certified paper unit cartons for cosmetics packaging** (Forest Stewardship Council) certified paperboard, made from raw materials from responsible sources.

*We act responsibly!*

We want to grow, but in a responsible way, within the framework of the Principles of Sustainable Development. That is why, as one of three Polish companies (and 27 in Europe), we have become a **Pioneer of the #CommitForOurPlanet** initiative, under the auspices of Cosmetics Europe - The Personal Care Association. This is a voluntary environmental commitment project of the European cosmetics industry. Our goal - as a Pioneer - is to actively work towards reducing greenhouse gas emissions, conservation of nature and natural resources and to implement sustainable packaging solutions. Our commitments will be continually reviewed. Each year, we will also report back on our activities within the framework of this initiative, so that we can show you our progress, too!

Would you like to learn more about how we care for the environment?  
Scan the QR code,  
find out about **#floslekecosteps** and join us!

Together we can achieve more!

## Revitalization and rejuvenation of the skin!

NEW

Restore glow, vitality and firmness to tired skin, prone to discoloration and wrinkles. GLOW effect - the skin becomes rested and the complexion gains a nice, healthy glow!

[ stable form of vitamin C, Fucocert®, Oligogeline®, phyto retinol, vitamin E, troxerutin ]\*

Stable form of **vitamin C**, gives a visible effect of brightening and rejuvenating the skin.

\* % of ingredients of natural origin is available next to each product

bye to dry with ...  
8 NIACINAMIDE

Say goodbye to dry skin!

NEW

Moisturize and smooth the delicate skin of the face, neck and neckline, prone to imperfections, irritations, discolorations and roughness. Enjoy brightened and moisture-saturated skin.

[ niacinamide, mallow root extract, polyglutamic, tranexamic and azelaic acids, squalane, prebiotic ]\*

Niacinamide (a derivative of vitamin B3) increases skin hydration, firmness and elasticity has an anti-wrinkle effect. Improves the lipid barrier of the epidermis, affects the production of collagen and stimulates the synthesis of hyaluronic acid. It evens out the skin tone and increases the skin's resistance to external factors.

## Strengthen your skin! Love yourself!

PRO AGE [20] [30] [40] [50]

Increase the skin's resistance to environmental stress. Restore vitality, hydration and relief. Show its beauty. Benefit self-confidence and excellent well-being.

### [ ashwagandha, ginseng, licorice ]\*

plants known and used for centuries, increasing the ability to adapt to unfavorable external conditions. The main feature is the elimination of the effects of fatigue and stress, which damage the beauty and accelerate the aging process of the skin. They protect against free radicals, detoxify, normalize and stimulate skin regeneration.

## ARNICA GEL

## SOS for puffiness and swell!

Soothes bruises and swelling. Reduce bruising and strengthen the skin.

[ arnica extract (5%), panthenol (1%) ]\*

mountain arnica extract has a positive effect on the condition of couperose skin, reduces the tendency to redness, soothes, regenerates and strengthens. Panthenol moisturizes, smoothes and elasticizes, accelerates the regeneration of the epidermis, has a soothing and calming effect.

\* % of ingredients of natural origin is available next to each product

## Family care adapted to the season!

### FAMILY CARE

Take care of proper skin care. Be it a mountain slope or a city center - cold, wind and overheated rooms have a negative effect on the skin.

[ shea and cocoa butter, vitamins A and E, vegetable oils, carnauba and candelilla wax, cornflower extract, oat milk, panthenol, allantoin, sunscreen, coral reef-friendly filter system ]\*

vegan formulas for the whole family, friendly to people with sensitive and allergy-prone skin, mild preservatives.

\* % of ingredients of natural origin is available next to each product
