FUTURE TECHNOLOGY THAT TRANSFORMS YOUR SKIN DAY AFTER DAY!

BIOTECHNOLOGY CONCEPT

FLOSLEK BIOTECH CONCEPT is a true revolution and the latest trend in regenerative cosmetology, based on the latest biotechnological advancements and the needs of conscious skincare. Key biotechnologically derived ingredients, such as plant exosomes, biomimetic peptides, microneedles, and ectoine, repair the skin, stimulate collagen production, and improve hydration, firmness, and elasticity.

FLOSLEK BIOTECH CONCEPT is more than just cosmetics – it's a personalized, professional skincare ritual for modern women who expect visible results without compromise.

5GF [PRO] VIT B₁₂+B₉

STIMULATION OF NATURAL SKIN RENEWAL

BIOTECHNOLOGY CONCEPT

FOR WHOM:

Cosmetics for women who value effectiveness, professional ingredients, and aesthetic packaging and whose appearance is a key element of their professional and personal success. Those focused on new technologies and interested in aesthetic cosmetology.

EFFECTS:

Technology developed to biorevitalize and rebuild skin and reveal a youthful glow.

- stimulates skin renewal and improves skin structure,
- regeneration, vitality, and skin protection,
- rebuilds the hydrolipid barrier.

RESEARCH:

The effects and effectiveness of our products are confirmed in application and instrumental tests.

FRAGRANCE:

notes of mint, peach, rose, jasmine, vanilla, amber, musk, and cedarwood.

INGREDIENTS:

Biotechnologically derived ingredients designed to stimulate skin renewal and regeneration and slow down the aging process.

- 5GF [PRO] - 5 growth factors
- Vitamin B12
- Vitamin B9

WE CARE FOR THE ENVIRONMENT:
Glass jars and bottles, FSC-certified boxes.

BEAUTY STRAIGHT FROM NATURE

FLOSLEK LABORATORIUM – a brand of skincare products dedicated to people with all skin types.

For over 30 years, FLOSLEK cosmetics have been nurturing and protecting the skin, bringing pleasure and relaxation. Not only in Poland, but also in 50 countries around the world: from North America, Europe, North Africa, and Asia.

The cosmetic formulas are inspired by nature, innovative, and safe. The products are PETA-certified, and almost 95% of the formulations are vegan. The effectiveness of the products is confirmed by application and instrumental tests in independent research laboratories. Quality and safety are the company's priorities.

SLOW AGING _____ COLLAGEN. 9^{MW}

bye to dry with ...
NIACINAMIDE

SAY GOODBYE TO DRY, SENSITIVE SKIN!

PRO SKIN

Up to
100%
improvement
in hydration**

FOR WHOM:

Cosmetics for dry, dehydrated skin prone to irritation, discoloration and imperfections.

EFFECTS:

- moisturizes and smooths the skin,
- improves elasticity and firmness,
- eliminates the feeling of roughness.

RESEARCH:

The effects and effectiveness of our products are confirmed in application and instrumental tests.

FRAGRANCE:

delicate and fresh.

INGREDIENTS:

Niacinamide (a vitamin B3 derivative) increases skin hydration, firmness, and elasticity, has anti-wrinkle properties. It improves the epidermal lipid barrier, evens out skin tone and stimulates the synthesis of hyaluronic acid.

- niacinamide
- mallow root extract
- polyglutamic, azelaic and tranexamic acids
- squalane
- prebiotic

FOR OVER 30 YEARS WE HAVE BEEN CREATING COSMETICS, WHOSE BENEFITS YOU CAN FEEL AND SEE ON YOUR SKIN!

Flos means **flower**, and flowers are associated with nature, but also with women and beauty. They possess this extraordinary power and are good for our skin – for centuries they have given us their best, so that we could take care of our health and beauty. They have been inspiring us from the very first days of our company. They also gave rise to the name of the company - FLOSLEK.

Since 1994 FLOSLEK cosmetics and dermocosmetics have been taking care of you, nurturing and protecting your skin, bringing pleasure and relaxation, and pleasing the eye. Not only in Poland, but also in 50 countries around the world, from North America, through Europe and North Africa to Asia.

NATURE IS AT THE HEART OF OUR FORMULATIONS. IT IS ALSO THE SOURCE OF INSPIRATION FOR OUR LABORATORY!

Everything we need to care for our bodies can be found in nature. That is why at FLOSLEK we focus on phytocosmetology.

During 30 years of operation we have used over 1500 different cosmetic ingredients, coming mainly from the world of plants, creating several hundred formulations with their use. That's how dozens of professional skin care lines were created for two brands: **FLOSLEK Laboratorium** and **FLOSLEK Pharma**.

We create innovative cosmetics, in line with the latest knowledge and European regulations. We are forever improving our formulas, always looking for ingredients with the potential to fulfil your needs even more effectively, for example those related to ageing processes, environmental pollution and increasingly common allergies. It's a never-ending process that pushes us to constantly follow trends, find and implement innovative solutions. In this process, we are supported by the extensive knowledge of our experts in the fields of botany and phytocosmetology and **our own modern laboratories: research and development and quality control**.

WE DIDN'T WAIT FOR SUSTAINABILITY, ENVIRONMENTAL PROTECTION AND NATURALNESS TO BECOME A TREND.

From our first days, we have been making sure that our activities do not harm you, animals or the environment. Our first cosmetic - the famous eyebright under eye gel - was vegan. Today, **around 95% of the formulations created in our laboratory are vegan cosmetics**, based primarily on ingredients of natural origin (**around 80% of our cosmetics have more than 90% ingredients of natural origin** in its composition). We've also never tested our products on animals – as evidenced today by our 2019 **PETA**.

THE QUALITY AND SAFETY OF COSMETICS ARE OUR PRIORITY!

Back in 2002, we implemented a quality management system, confirmed by the **ISO 9001:2015** certification. It was granted to us in the field of development of formulas for new cosmetic preparations and their production and sale.

In 2012, as one of the first cosmetic companies in Poland, we were granted a certificate confirming that during the production of our products we apply procedures based on the **GMP system (Good Manufacturing Practice)**.

In 2023, we implemented and certified the ISO 13485:2016 standard for medical devices. These provide a full guarantee that our products are of the highest quality.

FOR THE SAKE OF A BETTER FUTURE!

YES TO SUSTAINABLE DEVELOPMENT STRATEGY

The mission of the cosmetic industry is to keep looking good and beautiful. To achieve this, we must take into account the state of the environment in which we live, because it has a huge impact on health, and therefore beauty. We are aware that our decisions today will have a big impact on the world in which our children and grandchildren will live. That is why we are taking a number of actions to consolidate our position as a company operating ethically, in the spirit of sustainable development. The key areas for us are those in which we have the greatest influence, i.e. issues related to the protection and prevention of environmental degradation, social responsibility, corporate

In 2022, we combined the previously implemented initiatives with new ventures and created a coherent **ESG strategy – For the sake of a better future.**

**We want to act in such a way as to combine our business goals with care for the planet on which we live.
We want to be able to enjoy its plant life, our skin needs to stay healthy and beautiful – for years to come...**

IT'S OUR GREATEST CHALLENGE! YES TO A CLEAN ENVIRONMENT!

To date, we have implemented a number of pro-environmental solutions we called **#floslekecosteps**. We can proudly declare that:

We were one of the first companies in Poland to offer **creams in exchangeable refills, which are 100% recyclable**. Each refill means **80% less plastic and 60% less paper** in environment.

We have invested in **renewable energy sources** within our company. **The solar panels** installed in the first phase will meet 20% of our annual electricity needs.

We choose packaging that is **100% recyclable** (exception - barrier tubes) and, in addition, made partly from recovered and recycled plastic - recycle. Among tubes and bottles used to package our products, **85% are made with up to 50% PCR**. The proportion of glass packaging is steadily increasing among all the packaging we use.

From 2021 onwards, we only use **FSC®-certified paper unit cartons for cosmetics packaging** (Forest Stewardship Council) certified paperboard, made from raw materials from responsible sources.

WE ACT RESPONSIBLY!

We want to grow, but in a responsible way, within the framework of the Principles of Sustainable Development. That is why, as one of three Polish companies (and 27 in Europe), we have become a **Pioneer of the #CommitForOurPlanet** initiative, under the auspices of Cosmetics Europe - The Personal Care Association. This is a voluntary environmental commitment project of the European cosmetics industry. Our goal - as a Pioneer - is to actively work towards reducing greenhouse gas emissions, conservation of nature and natural resources and to implement sustainable packaging solutions. Our commitments will be continually reviewed. Each year, we will also report back on our activities within the framework of this initiative, so that we can show you our progress, too!
