

DERMOCARE

AS A SOURCE OF HEALTHY SKIN

PRODUCT GUIDE

2026

FLOSLEK Pharma is a brand of dermocosmetics created for the care of problematic skin, requiring the use of specialized preparations that complement the therapies recommended by dermatologists. When developing formulas for FLOSLEK Pharma dermocosmetics, we take into account the latest trends in cosmetology and dermatology. This is helped by the expert knowledge of our technologists and our own, modern laboratories: Research and Development and Quality Control.

HIGH EFFICIENCY

The effectiveness of FLOSLEK Pharma dermocosmetics is based on the well-known and described in dermatological literature active ingredients, mainly of plant origin. In addition to high efficiency, dermocosmetics are also characterized by excellent application properties and are very well tolerated by the skin.

SAFETY USE

The formulas of FLOSLEK Pharma dermocosmetics are rigorously tested by accredited testing laboratories. Our products pass application and instrumental tests under supervision of dermatologists, trichologists, ophthalmologists, gynecologists and paediatricians on people with sensitive and allergy-prone skin.

QUALITY ASSURANCE

FLOSLEK Pharma dermocosmetics are manufactured in a modern factory, meeting the standards of:

- ISO 9001:2015,
- ISO 22716 (GMP),
- ISO 13485:2016.

They give a full guarantee that these products are of the highest quality.

The brand is available in pharmacies and herbal stores.

USE IN THE CASE OF

- irritation, inflammation or infections the skin of the eyelids, the edges of the eyelids,
- Meibomian gland dysfunction
- with symptoms of dry eye syndrome
- symptoms of Demodex infection
- prophylactically to remove impurities
- allergens, pollen and eyelid secretions in conditions related to hypersensitivity or allergy (including allergic rhinitis, allergic reactions associated with the conjunctiva and the eye, allergic inflammation conjunctiva and eyelid margin)
- to eliminate dryness and irritation of the eyes, such as itching, a feeling of sand in the eye, pain, redness of the eyes.

HOW IT WORKS?

- effectively cleans the skin of the eyelids and eyelash roots from residual impurities and secretions
- reduces the symptoms of irritation caused by external factors
- reduces redness and discomfort of the eyelids skin and their edges
- moisturizes and regenerates sensitive, dry skin, which strengthens its natural protective barrier
- recommended for cleansing the skin of the eyelids in the presence of Demodex.

COMPOSITION

Purified Water, poloxamer 184, glycolidipropylene, ethylhexylglycerin, caprylylhydroxamic acid, pentylene glycol, sodium chloride, panthenol, inulin, alpha-glucan, eyebright extract

HOW TO USE

Before using the product, wash your hands thoroughly. If you wear contact lenses, remove them before use. Open the package, soak clean cotton pads with a small amount of the solution. Keeping the eyelids closed, gently apply a cotton pad over the eyelid, and then gently (without rubbing or pressing) wipe the eyelid and eyelashes making movements from the outer side of the eye to the medial side (towards the nose) at the base of the eyelashes and along the base of the eyelashes, gently massaging the eyelid with small in circular movements, removing any impurities or secretions. Carefully wipe the outer rim of the eyelid with a moistened cotton pad, avoiding contact with the eye and the conjunctiva (the inside of the eyelid). The product does not require rinsing after use. Cleansing can be repeated several times a day.

UNDER-EYE PRODUCTS

Dermocare of skin around the eyes

“Herbal compress”, rich in plant active ingredients, especially **eyebright extract**, recognized in natural medicine, used in ophthalmic preparations. The products bring immediate relief, perfectly moisturize and smooth skin around the eyes.

- the dermocosmetics are designed to provide specialist care for delicate and sensitive skin in the eye area
- the products provide perfect care of dry and tired skin around the eyes, have a soothing effect to the skin prone to irritation and redness
- natural composition - the products contain over **90% ingredients of natural origin**
- developed based on the knowledge and practice of dermatology and ophthalmology
- safe with contact lenses, suitable for the care of the skin around the eyes after eyelash styling, permanent makeup, make-up removal.

CICA CARE

NEW

Derma care for skin in need of regeneration and reconstruction

Dermocosmetics for sensitive skin prone to irritation, redness, dryness, thinning skin in need of regeneration and reconstruction. They owe their effectiveness to the combination of ceramides and active molecules extracted from Centella asiatica.

- recommended for skin regeneration and soothing, e.g. after aesthetic medicine procedures, depilation, shaving, during retinoid therapy, with atopic dermatitis, scars and stretch marks
- strongly and effectively regenerate, intensively and long-lasting moisturise, counteract dryness, eliminate skin flaking and roughness
- regenerate the hydro-lipid coat of the epidermis

DERMO EXPERT®

Specialist skin dermocare

Innovative dermocosmetics for comprehensive dermocare of problematic, damaged skin, requiring specialized treatment. Effective and safe formulations based on strongly concentrated ingredients of the highest quality, recommended as a supplement, continuation or alternative to professional treatments.

ACID PEELS NIGHT CARE

- modern dermocosmetics for the care of problematic skin: oily skin, prone to acne, skin with discolorations, mature skin with signs of aging
- acid peels for intensive renewal of demanding skin by exfoliation
- the products containing carefully selected the highest quality ingredients, provide spectacular effects from the very first application, prepare the skin for the next stages of care.

SERUMS

- innovative dermocosmetics for care of mature skin with signs of aging: loss of firmness, wrinkles and crow's feet, tired and dry skin. For all skin types, including sensitive skin.
- properly designed recipes, rich in highly concentrated active ingredients with proven effects, ensure multidirectional action.

PRZEBADANY DERMATOLOGICZNIE

ACTIVE cold

Gel for muscle and joint pain is a medical device intended for topical use, for tense, painful, tired muscles and joints, with pain-relieving effect. It is recommended for use as a temporary aid in relieving pain in the case of ailments of the musculoskeletal system and to alleviate the effects of injuries.

ACTIVE COLD GEL FOR MUSCLE AND JOINT PAIN

EAN: 5905043026145

BLOZ:

INDEX: FL5116

100 ML

USE IN THE CASE OF:

- complaints of the musculoskeletal system, the joint area,
- tension and pain in muscles and joints,
- ailments of muscles and joints after intensive physical effort,
- bruises, contusions without epidermal breaks,
- post-traumatic inflammation of muscles, joints,
- painful shoulder stiffness,
- muscle strains,
- ankle sprains, joint sprains,
- rheumatic pains, neuralgia, spinal muscular pains,
- swellings,
- tired, heavy, aching hands, feet and legs,
- prophylactically for people doing prolonged standing, sitting work,
- before and during physical activity, to prepare muscles and joints for exertion,
- for painful muscle spasms,
- prophylactically when travelling,
- for children under 6 years of age, if prescribed and supervised by a doctor.

HOW IT WORKS?

Soothing pain by immediately cooling the site of injury. The effect of the preparation is based solely on the physical action of the cooled hydrogel on the skin surface. The gel for muscle and joint pain forms a hydrogel film on the skin surface providing an immediate cooling effect. Storing the product in a refrigerator before application increases its effectiveness. The evaporating effect prolongs the cooling sensation over time. The cooling effect brings immediate relief from ailments caused by intense physical exertion, cramps or muscle tension. The cooling effect at the site of the ailment reduces the risk of swelling, bruises and haematomas. In addition, the cooling effect can speed up recovery.

HOW TO USE:

Chill before use in the refrigerator. Apply a quantity of product directly to the painful area to form a thin gel layer on the skin surface. Leave on the surface of the skin until the cooling sensation subsides. The gel can be applied several times a day as required. Continue to apply for several days after the symptoms have subsided. Cold therapy has the best effect applied as soon as possible after the injury. If there is no improvement or if the condition worsens, additional symptoms appear, contact your doctor.

COMPOSITION:

DRY SKIN

Dermocare of dry skin

The products recommended for care of sensitive, dry skin, prone to excessive exfoliation and loss of elasticity. Perfect for skin prone to burning and redness.

- the preparations intensely moisturize the skin, smooth and firm the epidermis
 - they bring relief to the skin prone to irritation and hypersensitivity, protect against moisture loss, support the regeneration of the epidermis
 - reduce the feeling of dryness and excessive roughness and the tendency to exfoliation and cracking of the epidermis
 - make the skin more elastic and firm, prone to sagging
 - aloe extract contains nourishing and regenerating ingredients, with moisturizing and protective properties.
-
- Aloe vera juice is extracted from leaves of *A. barbadensis*, its main active ingredient are polysaccharides, capable of retaining large amounts of water and thus enabling the plant to survive in dry conditions.
 - Aloe vera juice is a rich source of amino acids, glycoproteins, enzymes, organic and inorganic acids and salts, vitamins. These compounds give it regenerative, soothing, emollient, conditioning properties.
